

Coniocleonus hollbergii - Remark

Coniocleonus hollbergii (Fåhræus, 1842) and *C. turbatus* (Fåhræus, 1842). Citations for these species in regional faunas and checklists, including Fauna Europea, are uncertain due to misconcepts and misidentifications. *Cleonus hollbergii* Fåhræus, 1842 was described from Kazakhstan (Zaisan lake); the application of this name to the European species is uncertain and only countries for which controlled documentation is available are listed. Countries with undocumented citations of *C. hollbergii* are reported in *italics*: in most cases they are likely to refer to *C. turbatus*.
